

**EITAS**  
**DEEP RETROFIT**  
**PROGRAMME**

The EITAS Deep Retrofit Framework is a team of design, management and installation professionals focused upon delivering all aspects of your Deep Retrofit Project - providing a cost effective solution that maximises government Grant and Energy Credit support.

Our team of expert designers will develop a bespoke solution for each project - modelling the precise project requirements based upon detailed pre-works surveys of each home.

Upon project approval we can utilise teams of accredited and approved delivery professionals from within the EITAS Framework to deliver all works to the agreed specifications. At all times EITAS will manage the project to ensure full compliance and to access the SEAI Grants and Energy Credits available.

**Typical works will include:**

- Heat Pumps • Underfloor Heating
- Attic Insulation • Cavity Insulation
- External & Internal Insulation
- Air Tightness Detailing and Blower Door Test
- Ventilation Systems • Solar Thermal & PV
- Double and Triple Glazed Windows and Doors

For further information on the services available contact **info@eitas.ie** or telephone **016 533119**

Through the Deep Retrofit Framework EITAS has procured some of Ireland's most experienced and competent Contractors to deliver best in class installation standards. The EITAS Management team will design a solution that meets with the specific needs of each home and then manage the installation professionals through to completion and full system commissioning.

**EXTERNAL WALL INSULATION**

**WINDOWS AND DOORS**

**HEAT PUMP**

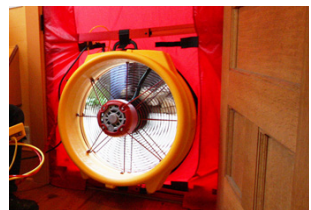

**UNDERFLOOR HEATING**

**ATTIC INSULATION**
