

EITAS Deep Retrofit Framework

EITAS is one of Ireland's leading providers of Energy Management Solutions - with a particular focus on the management of Energy Credits within SEAI supported programmes.

EITAS has fully recognised the need for momentum in the promotion of "Deep Retrofit" to help improve energy efficiency and reduce running costs of our existing housing stock. Deep Retrofitting involves a substantial upgrade of a building (as opposed to one-off/individual measures) so that it moves closer to zero energy requirements or a significant reduction in the energy required within a building. Deep retrofitting looks at the entire building and a bespoke solution is designed for each house which considers all aspects such as building fabric, air tightness, ventilation and renewable energy sources.

EITAS recognises that most energy retrofit contractors specialise in a limited number of measures and may only be in a position to complete a single aspect of any Deep Retrofit solution. To help promote the Deep Retrofit initiative, EITAS has launched the Deep Retrofit Framework as a means of assisting Approved Contractors in developing new work streams/opportunities, improving knowledge and awareness of Deep Retrofit principles/practices and acting as a broker to facilitate increased activity within the Deep Retrofit sector. As a registered contractor, the Deep Retrofit Framework can assist you in the following ways:

- The EITAS Deep Retrofit Programme will develop projects through active promotion and advertisement. To deliver solutions EITAS will offer Framework members the opportunity to tender for these works based upon the measures and geography detailed within their registration.
- Where you have received an active lead but require assistance on a delivery of works outside your remit (e.g. in pricing for an Air Source Heat Pump you require assistance in the installation of Solid Wall Insulation), EITAS can utilise the Framework to assist you in accessing a cost effective, high quality solution from an approved contractor - ensuring that you can deliver the holistic solution requested by your Client.
- If at any stage you need assistance or guidance on how to develop or implement a Deep Retrofit project, EITAS can assist at every stage to help manage, survey, design or Quality Assure the project;

In order to access the benefits of the EITAS Deep Retrofit Framework, please complete the application below and submit to info@eitas.ie along with the supporting documents. The EITAS team will contact you to complete the application process and finalize your registration.

1. Company Details:

Company Name:	
Company Address:	
Contact Name:	
Contact Telephone:	
Contact Email:	
SEAI Registration No <i>(If applicable)</i>	

2. Preferred Measures and Locations

Please tick the relevant box to confirm then measures you are in a position to deliver and the preferred location in which to deliver those services.

Measures	Service Areas				
	Dublin	Leinster (Excluding Dublin)	Munster	Connaught	Ulster
Air Source Heat Pump					
Solar Water Heating					
Roof Insulation					
Cavity Wall Insulation					
Internal Insulation					
External Insulation					
Floor Insulation					
Double/Triple Glazed Window & Door Replacement					
Air Tightness Detailing					
Mechanical Heat Recovery Ventilation Systems					
Other (Please Detail)					

3. Supporting Documentation

For registration to the Framework, the following information should be submitted with your application:

Document	Tick to confirm submission
Tax Clearance Certificate	
Public and Employers Liability Insurance	
Confirmation of relevant registrations (e.g. RGI, Safe Electric, Heat Pump, etc)	

4. Declaration

Please sign below to confirm that the above information is accurate and that you have all of the required competencies and qualifications to deliver the works detailed.

Print Name:		Signature:		Date	
--------------------	--	-------------------	--	-------------	--

5. What happens next?

- The EITAS team will complete your registration.
- Once registered you will be emailed with tender opportunities for works relevant to your selected work category and area.
- If at any stage you require assistance or guidance on either progressing a measure/project you can contact the EITAS team on either:

Telephone 01-6533119 **Email** - deepretrofit@eitas.ie
